

ABRAM ANWAR IBRAHIM

Beni Suef, Egypt | ibram.a.nassif@gmail.com | github.com/Abram-Anwar | linkedin.com/in/abram-anwar-1159a8313/

PROFESSIONAL SUMMARY

Front-End Developer with hands-on experience building responsive web applications using HTML5, CSS3, JavaScript, and React. Skilled in developing reusable components, interactive forms, responsive layouts, and user-focused interfaces. Experienced with DOM manipulation, browser APIs, asynchronous JavaScript, React Hooks, and React Router through personal projects. Continuously developing problem-solving skills and modern web development practices, with a focus on growing as a React Developer.

TECHNICAL SKILLS

Frontend Development: HTML5, Semantic HTML, CSS3, JavaScript (ES6+), React, Responsive Web Design, DOM Manipulation

React Development: Components, Props, State Management, React Hooks (useState, useEffect, useContext, useRef, useReducer), React Router

JavaScript & Programming: ES6+, Asynchronous JavaScript, Promises, Async/Await, Fetch API, Object-Oriented Programming (OOP), Local Storage

Tools & Version Control: Git, GitHub, Vite, Visual Studio Code, Chrome DevTools

PROJECTS

ELMANHRY — Online Application Service

- Developed a responsive Arabic RTL web application for an online application service using React.
- Built reusable React components and interactive multi-step application forms.
- Implemented form validation, conditional fields, image uploads and previews, and dynamic application data.
- Designed responsive layouts for desktop and mobile using custom CSS.
- Implemented application flow and payment-related UI based on project requirements.

Student Management System

- Developed a responsive student management dashboard using HTML, CSS, and vanilla JavaScript.
- Implemented CRUD operations for managing student records using Local Storage.
- Added search, filtering, pagination, form validation, editing, and image preview functionality.
- Implemented theme switching and persistent application data using browser storage.

Interactive JavaScript Projects

- Developed practice applications including a quiz, memory game, to-do app, password generator, and guessing game.
- Applied DOM manipulation, event handling, Local Storage, arrays, objects, and asynchronous JavaScript concepts.

EDUCATION

Beni-Suef University — Faculty of Science

Bachelor in Physics | 2024 – 2028
